Summary

Motivated Computer Engineering graduate with hands-on experience in manual testing, automation using Selenium WebDriver with Java, and full-stack software development. Proficient in test case design, defect tracking, functional UI testing, and relational databases. Strong foundation in Java, Object-Oriented Programming (OOP), and Spring Framework, seeking to contribute to quality assurance and software engineering teams.

Technologies

- **Programming Languages:** core Java ,SQL Core Concepts**:-** OOPs, Multithreading
- **Software Testing & QA:** Manual Testing, Functional Testing, UI Testing, Performance Testing, Test Case Design,
- Execution, Bug Reporting, Defect Life Cycle
- **Automation Testing:** Selenium WebDriver, TestNG
- **Programming Languages:** Java, Core Concepts, Basics of DSA, OOPs
- **Web & Frameworks:** HTML5, CSS3, JavaScript, JDBC, Spring Framework, Collections
- **Databases:** MySQL, SQL
- **Tools & Platforms:** Eclipse, VS Code, Trello , JIRA

Education

BE in Computer Engineering(Computer Engineering)
- SSPMS, Someshwarnagar | CGPA: 8.51 | Nov 2022 – June 2025

Diploma in Computer Engineering
- Government Polytechnic, Osmanabad | Percentage: 81.60% | Aug 2019 – June 2022

S.S.C
- Jay Bharat Vidyalaya, Nilanga | Percentage: 77.60% | June 2018 – June 2019

Experience

Test Engineer Intern | Resonics Technologies, Pune **July 2026 -Present**

- Designed, documented, and executed detailed test cases and test suites based on functional and UI requirements.
- Performed functional, regression, UI, and performance testing across multiple web applications to ensure cross-browser quality.
- Logged, tracked, and verified defect fixes using bug-tracking workflows, confirming post-fix system stability.

Web Development Intern | ProAzure Software Pvt. Ltd., Pune **Jan 2024 -Feb 2024**

- Built and optimized responsive front-end components using HTML, CSS, and JavaScript.
- Collaborated with developers to improve website layouts, ensuring user interface consistency and cross-device compatibility
- Assisted in maintaining web application codebase and testing front-end components prior to release.

Projects

DeepFake Detection System (Python, ML)
- Developed a Machine Learning classification system to detect manipulated vs. real images.
- Built a responsive front-end interface using HTML and CSS for seamless image uploads and result visualization.

School Management System
- Developed a School Management System (SMS) using HTML, CSS, and MySQL to manage daily operations of a school or educational institute.
- Modules include student management, staff management, attendance tracking, and examination records.

Art Gallery-Website

- Developed a web application to manage artwork, artist, exhibition, and sales information.
- Designed user-friendly web pages for displaying and managing records.

Accomplishment/Certifications

- **Java Full Stack Development Training** – VibrantMind Technologies Pvt. Ltd., Pune
- **HackerRank Certifications:** SQL (Intermediate), SQL (Basic), JavaScript (Basic)
- **Academic Achievement:** Ranked 2nd in Third Year Engineering (TE) with an SGPA of 9.2
- **Software Testing Program –** EXCELR, Raising Excellence Participated in a Software Testing Program covering software testing fundamentals and QA concepts. Gained practical exposure to software testing methodologies and quality assurance practices.
